

Software Developer

Miriam Wolpin | 058-3242135 | Miryamwolpin@gmail.com | [LinkedIn.com](https://www.linkedin.com/in/miriamwolpin/)

Summary

- **5+ years** of experience building **web applications** and scalable **backend systems** with experience in **B2B** and **cloud-based environments** (**Synamedia** and **Applied Materials**)
- Experienced in designing and developing **microservices**-based systems using **Node.js**, **MongoDB**, **Redis**, **DynamoDB**, and **AWS** services, including **Lambda**, **S3**, and **SQS**.
- Experienced in **end-to-end feature delivery** with **React.js**, **TypeScript**, **Redux**, and modern React patterns.
- Contributed to **DevOps** and **delivery workflows** through **CI/CD** automation, **GitHub Actions**, **Docker**, **Kubernetes**, and monitoring tools such as **Prometheus** and **Lightstep**.
- **Strong testing background** across frontend and backend, including **Jest**, **Cypress**, **Mocha**, component tests, gating tests, and load tests in **TDD-oriented** development environments.

Professional Experience

2023 – Today **Software Developer – Backend (Cloud)**, **Synamedia**

- Working on **backend development** within a **microservices architecture**.
- Technologies include **Node.js**, **MongoDB**, **Redis**, **DynamoDB**, and various **AWS services** (**Lambda**, **S3**, **SQS**).
- Designed and implemented scalable **backend solutions** to support **high-volume user traffic** using Node.js.
- Deployed new services using **Docker** and **Kubernetes**, managing containerized applications in a cloud environment.
- Built and maintained **AWS-based infrastructure** with a focus on high availability, scalability, and performance.
- Integrated logging and monitoring tools (**Prometheus** and **Lightstep**) for performance metrics and error analysis.
- Contributed to **CI/CD pipelines**, including the creation and maintenance of **GitHub** workflows and automation processes.
- Collaborated in an **Agile Scrum team**, participating in **sprint planning**, **code reviews**, and **daily stand-ups**.
- **Developed component tests**, **gating tests**, and **load tests** using Mocha to ensure code quality and system reliability.
- Leveraged **AI development tools** (**GitHub Copilot**) to accelerate backend feature delivery and code review cycles.

2022 – 2023 **Software Developer – Fullstack**, **Synamedia**

- **End-to-end development** using **React.js**, **Node.js**, and **MongoDB** within a microservices architecture.
- **Led development tasks** in close collaboration with **Product** and **UI/UX teams** to ensure a smooth and intuitive user experience, leveraging **React Hooks**, **Context API**, and **asynchronous patterns**.
- **Optimized frontend performance** by minimizing unnecessary API calls and enhancing the use of React Hooks.
- Integrated with **backend services** via **RESTful APIs**, focusing on efficiency and clarity of data flow.
- Wrote and maintained **automated tests** using a **TDD** approach: **Cypress** for frontend and **Mocha** for backend.
- Worked within an **Agile/Scrum framework**, utilizing tools such as **JIRA**, **AWS services**, **Postman**, **Figma**, and **Git**.

2021 – 2022 **Front End Developer**, **Applied Materials**

- Built and maintained **client-side features** for enterprise **software products**, enhancing product interfaces, integrating with **backend** components, and resolving critical **UI issues** in a monolithic system.
- Development with **React + Redux**, **TypeScript**, **CSS**, utilizing **React Hooks**, **Context API**, and writing **Unit Tests** with **Jest**.
- **Worked closely** with UX/UI teams, providing feedback and implementing adjustments for a better user experience.
- Participated in **Agile processes**, using **JIRA**, **Jenkins**, and **Git**. Environments: **WebStorm**, **IntelliJ**, and **Easy Starter**.

Education

2018 – 2020 **Mathematics and Computer Science Core Studies Graduate**, Adva Program by Scale-Up Velocity.

- Focused on backend development, including **Python**, **SQL**, algorithms, object-oriented design, Linux, and hands-on software projects in collaboration with leading universities and tech companies.
